

HAMAD UR REHMAN

SQA Engineer

Islamabad, Pakistan | +92 331 8419013 | rehmanbangash946@gmail.com [Linkedin](#) | [My Portfolio](#)

SUMMARY

ISTQB-certified Software QA Engineer with 2 years of experience in **manual** and **automation** testing across **web**, **ERP**, **AI-driven** platforms, and **mobile** applications. Experienced in test planning, test case design, defect lifecycle management, and API testing across **150+ REST** endpoints in multi-role enterprise workflows using **Postman** and **Swagger**. Skilled in **Agile** and **Scrum** environments with strong knowledge of **SDLC** and **STLC**. Proficient in **Jira**, **Playwright**, and **SQL**, with a proven record of improving software quality and reducing production defects by 40%.

TECHNICAL SKILLS

Manual Testing: Functional, Regression, Integration, System, Smoke, Sanity, UI Testing, UAT, End-to-End Testing, Cross-Browser Testing, Risk-Based Testing.

Automation Testing: Playwright (JavaScript), Selenium.

Performance Testing: JMeter.

Test Management: Test Planning, Test Strategy, Test Case Design, Test Documentation, Test Coverage, Defect Tracking.

API Testing: Postman, Swagger.

Methodologies: Agile/Scrum, SDLC, STLC.

Tools: Jira, Zephyr, TestRail, Slack, Google Workspace, Confluence, BrowserStack, Chrome DevTools, Prisma Studio, Git, GitHub Actions.

Database Testing: SQL, MySQL, MongoDB, Data Validation.

Platforms: Web Applications, ERP Systems, AI Platforms, Mobile Applications.

Languages: JavaScript, Python, Java.

EXPERIENCE

Pak Dev Studio

Jan 2026 – Present

QA Engineer — Onsite

- Validate 150+ REST APIs across 12+ user roles using Postman and Swagger, improving backend reliability and cutting integration defects by 30%.
- Improve release coverage by developing Playwright automation scripts, reducing manual testing effort by 20% across 5+ critical workflows.
- Confirm data accuracy across 38 database tables by verifying backend records in Prisma Studio after every API operation.
- Detects and triage 20+ critical defects per release cycle, conducting root cause analysis and verifying fixes to maintain product stability.
- Validate end-to-end digital wallet and payment workflows, catching 5+ critical payment defects pre-release and ensuring zero transaction failures in production.

Decimal Solution

May 2025 – Dec 2025

Junior QA Engineer — Onsite

- Designed and maintained 400+ test cases across 6 ERP modules, increasing defect detection rate by 25%.
- Identified, documented, and tracked 20+ critical defects in core ERP modules using Jira, achieving a 95% defect closure rate within sprint cycles.
- Executed 5 testing types i.e functional, UI, integration, smoke, and end-to-end testing across each release to ensure system reliability.
- Verified 50+ backend service endpoints and payloads via API contract testing to validate error handling and response accuracy.
- Used SQL queries to confirm data correctness across 10+ ERP tables after each system update.

- Designed and executed 80+ test cases for web and mobile applications, catching 15+ critical issues before release.
- Ran functional, smoke, sanity, and UI test suites on Android devices across 3 OS versions, contributing to a 40% improvement in release stability.
- Tested REST APIs with Postman to validate backend endpoints, request/response validation, and status codes.
- Logged and tracked 40+ defects in payment and onboarding flows via GitHub Issues.

PROJECTS

DAR/DALC — AI-Powered Enterprise Platform (6-Module System) 2026

- Owned QA for an AI-driven ERP platform covering 12+ user roles, 150+ APIs, and 38 database tables.
- Automated 10+ critical regression workflows using Playwright, reducing re-test cycle time by 30%.
- Confirmed data accuracy across 38 database tables by executing targeted SQL validation after each deployment.
- Executed 4 testing types i.e functional, integration, negative, and end-to-end testing across all core modules.

Gamer PC — ERP System 2025

- Covered 4 ERP modules inventory, sales, customer, and order management across 500+ test cases in an Agile environment.
- Conducted backend endpoint validation and SQL database checks, identifying 15+ data sync and business logic defects.
- Contributed to 3 consecutive defect-free sprint releases through thorough pre-release verification.

Trakviva Fit — Fitness & Wellness App (iOS) 2026

- Validated 8+ core features including personalized meal planning, food photo scan, fasting support, activity and exercise tracking, water goal monitoring, custom meal creation, and streak system across iOS.
- Used Xcode Simulator and manual device testing to identify bugs, validate user flows, and ensure a smooth onboarding and in-app experience before public release.
- Live on the App Store: [Trakviva Fit](#)

KEY ACHIEVEMENTS

-
- Improved release stability by 40% through comprehensive regression and functional testing.
 - Reduced manual QA effort by 20% by implementing Playwright automation.
 - Identified 40+ critical defects in pre-production, preventing production incidents.
 - Maintained and executed 800+ test cases, ensuring consistent test coverage across releases.
 - Ensured stability of a multi-role enterprise platform covering 12+ user roles, 150+ APIs, and 38 database tables.

EDUCATION

Bachelor of Science in Computer Science (BSCS) CGPA: 3.5 / 4.0

University of Peshawar — 2024

CERTIFICATIONS

-
- ISTQB Foundation Level — Board Infinity (Coursera)
 - Introduction to Software Testing — University of Minnesota (Coursera)
 - Project Management — Google (Coursera)
